DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,5,7 are rejected under 35 U.S.C. 102(b) as being anticipated by Maresh (5895339).

Maresh discloses an elliptical exercise device having pedal 655 connected to cranks 620; linkages (unlabeled) below the cranks and which are pivotally mounted at axis A and linkages 690 (actuator) which together act to pivotally displace the crank axis of rotations in an arcuate rocking manner.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Whan-Tong et al (6146313).

Whan-Tong discloses an elliptical exercise device as shown in figure 23 having foot pedals 27i connected to cranks 24ai for producing a first motion restriction which is a circular motion. Linkages 811,815,813 act to vertically displace (translate) the cranks on the frame 20i. This creates the second motion restriction.

Allowable Subject Matter

2. Claims 4,6,8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

3. Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.
